**Subject:** Council Meeting Testimony on Bill 10

Dear Council Members:

If you eat seafood, you probably have plastic in you, just as I do. Plastic does not biodegrade; it doesn't compost. At most, it breaks down into smaller and smaller pieces. Small fish eat it; bigger predators eat them, etc., until it ends up in us.

I hope you care about our innocent sea creatures and sea birds killed by plastics. I hope you at least care about yourself and your loved ones eating plastic. I hope you will pass Bill 10 and put a deterrent on plastic bags.

Personally, I reuse all my plastic bags, but too many people do not. I see them flying around the street. It's shocking to see them tangled in bushes by the beach and realizing how many were not caught in a bush and went into the sea to tangle up the turtles and other sea creatures.

Please, we have to do something to stop this horrible mess!
